

## MATH CLASS LEV.2

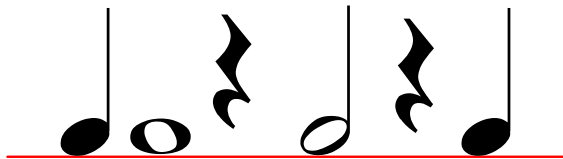

Remind students of their finger colors. When tapping through the notes, indicate which finger colors you want them to use...ie. Right Hand red and Left hand green.

Make an even tapping sound. Have students tap with both hands simultaneously at the proper time for the notes as they say the number of beats for the note they are tapping. This set totals 13 beats.

1 2 3 4, 1, 1 2, 1, 1 2 3 4, 1

## MATH CLASS LEV.2

Remind students of their finger colors. When tapping through the notes, indicate which finger colors you want them to use...ie. Right Hand brown and Left hand blue.

Make an even tapping sound. Have students tap with both hands simultaneously at the proper time for the notes as they say the number of beats for the note they are tapping. This set totals 10 beats - 2 of which a silent so have the students say "shhh" for the rests (but for only 1 beat!).

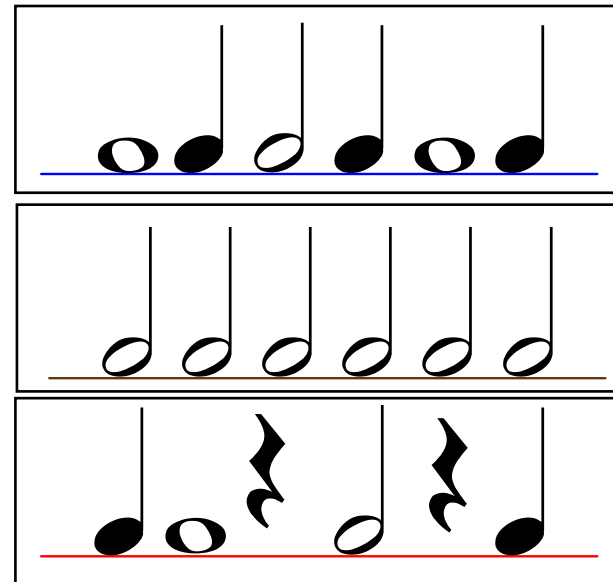

1, 1 2 3 4, shhh, 1 2, shhh, 1

Continue to use the Math Level 1 Activity sheets.

Use these additional sheets in the same manner as you used the Level 1 sheets. Also have students vertically line up in a particular order several sheets vertically and go from one to another without skipping a beat.

I recommend that these activity sheets always be laminated. Again, paste the activity instructions on the back of your note sets for ease in counting through the beats while the right side of your sets are facing the students.
