

These are walking notes for the green grass shoe steps.

These whole notes just walk wait wait wait.

They are really slow...lots of occasions the last note in a song.

Let's walk with them on our footsteps

Ready? (Clap the beats as they walk.)

Walk **wait wait wait**

Let's walk with another note. Which one would you like? (Walk with whatever they want.)

OK, now let's mix them up and walk. If you get to the end of your footsteps, just start over again.

Wow! Now let's mix them up a different way and walk on our shoe steps.

Good Job!

Just trim notes a quarter to half inch away from each.

Laminate, then cut about a half inch away from each trimmed note. Cut a shape
